Wide Balls & No Balls by Bowler

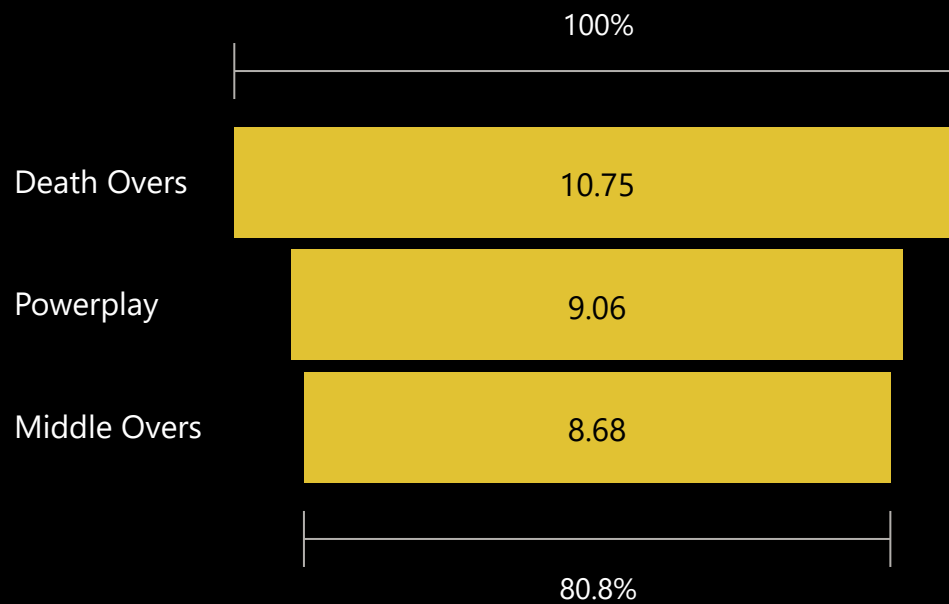

Insight Panel :

Elite Bowlers balance wickets and econmy | Dot - balls pressure wins matches | Death overs are high reward, high risk | Discipline reduce unforced runs

Death Overs Create Maximum Match Impact

Overall Phase Run Rate of IPL

SURPRISING FINDING :

- Winning the toss has far less impact on IPL victories than death-over execution and bowling pressure.

- Death overs generate the highest scoring acceleration.
- Dot-ball pressure impacts outcomes more consistently than wicket-taking alone.
- Chasing advantage changes significantly across venues.

CONCLUSION PANEL :

The modern IPL is increasingly decided by tactical execution, finishing efficiency and bowling pressure rather than by toss outcomes alone.
